bb.db

*2008 Baseball Databank Database*

---

**Description**

The Baseball Databank Database is a SQLite database containing statistics on each player and team in Major League Baseball from 1871 through 2008.

**Format**

The file is a SQLite database

**Details**

This file is used as an example in the book "R in a Nutshell" from O'Reilly Media.

Note: the file is in the "inst/extdata" directory inside the package, not the "data" directory.

**Source**

<http://www.baseball-databank.org/>

**Examples**

```
library(RSQLite)
drv <- dbDriver("SQLite")
con <- dbConnect(drv, system.file("extdata", "bb.db", package="nutshell.bbdb"))
dbListTables(con)
```
