February 21, 2018

Title Beautiful Graphical Representation of Multiplication Tables on a Modular Circle

Version 0.1

Description By placing on a circle 10 points numbered from 1 to 10, and connecting them by a straight line to the point corresponding to its multiplication by 2. (1 must be connected to $1 * 2 = 2$, point 2 must be set to $2 * 2 = 4$, point 3 to $3 * 2 = 6$ and so on). You will obtain an amazing geometric figure that complicates and beautifies itself by varying the number of points and the multiplication table you use.

rusk-package

Beautiful graphical representation of multiplication tables

Description

By placing on a circle 10 points numbered from 1 to 10, and connecting them by a straight line to the point corresponding to its multiplication by 2. (1 must be connected to $1 * 2 = 2$, point 2 must be set to $2 * 2 = 4$, point 3 to $3 * 2 = 6$ and so on). You will obtain an amazing geometric figure that complicates and beautifies itself by varying the number of points and the multiplication table you use.

Details

Use `draw()` or `draw_app()`

draw

Beautiful graphical representation of multiplication tables

Description

By placing on a circle 10 points numbered from 1 to 10, and connecting them by a straight line to the point corresponding to its multiplication by 2. (1 must be connected to $1 * 2 = 2$, point 2 must be set to $2 * 2 = 4$, point 3 to $3 * 2 = 6$ and so on). You will obtain an amazing geometric figure that complicates and beautifies itself by varying the number of points and the multiplication table you use.

Usage

```
draw(table = 2, modulo = 10, label = FALSE)
```

Arguments

table	multiplication table to plot
modulo	number of points to use
label	show number label

Value

a ggplot

Examples

```
draw(table=2,modulo = 10, label=TRUE)
draw(table=2,modulo = 50, label=FALSE)
draw(table=2,modulo = 250)
draw(table=10,modulo = 250)
```

draw_app

open shiny app

Description

open shiny app

Usage

```
draw_app()
```
